DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because abstract fails to comply with MPEP § 608.01(b) (c) in such that abstract exceeded more than 150 words. Correction is required.
2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 drawn to display driving, class 345, subclasses 169.4.
 - II. Claim 5 drawn to gray scale, classified in class 345, subclass 89.
 - III. Claims 6-9, 13-14 drawn plurality of unit transistor, classified in class 345, subclass 76.
 - IV. Claim 10-12 drawn to display structure, classified in class 345, subclass 206.

The Inventions are distinct, each from the other because of the following reasons: Groups I, II, III and IV are related as subcombinations disclosed as usable

Art Unit: 2629

together. Groups II, III and IV do not require the details of group I therefore this groups are distinct. The subcombinations are distinct if they do not overlap in scope and are not obvious variants and if it is shown that at least one subcombination is separately usable. See MPEP § 806.05(d).

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
